

AMENDMENT No. 1

Project: Kosovo Comprehensive Approach to Health System Strengthening Project (KOMPAS)

Procurement Title: Procurement of Transport Vehicles for Medical Waste (MW)

Reference No.: XK-MoH-1.3.3e-GO-RFB

To: All Prospective Bidders

Subject: AMENDMENT No. 1

Date: July 07, 2026

1. Amendment to Technical Specifications – Payload Capacity

Reference is made to the Bidding Documents issued under the above-mentioned Request for Bids.

Following an internal review of the bidding documents and clarification requests received from several interested bidders, the Purchaser hereby amends the technical specification relating to the payload capacity as follows:

Current requirement:

- Payload capacity: **1,400–1,500 kg**

Revised requirement:

Waste payload capacity: not less than 950 kg (higher payload capacities are acceptable, provided that all other technical requirements and the maximum legally permitted Gross Vehicle Mass (GVM) of 3.5 tons are complied with)

This amendment is made to align the technical specification with the industry standard for converted 3.5-ton temperature-controlled hazardous waste vehicles. A waste payload capacity of not less than 950 kg reflects the typical payload capacity available for this vehicle category, allowing the transportation of approximately one ton of medical waste while maintaining compliance with the maximum legally permitted Gross Vehicle Mass (GVM) of 3.5 tons. The amendment also aims to ensure technical feasibility, increase market availability, and promote fair and effective competition among qualified manufacturers.

2. Amendment to Bid Submission Deadline

In light of clarification requests received from several interested bidders, the Bid Submission Deadline is hereby extended as follows:

Current deadline:

- 17 July 2026 at 14:00

Revised deadline:

- 24 July 2026 at 14:00

This extension provides bidders with additional time to take the above amendment into account when preparing their bids.

3. General Provision

All other terms and conditions of the Bidding Documents shall remain unchanged.

For the avoidance of doubt, any previous clarifications issued by the Purchaser regarding the payload capacity requirement, including any statements indicating that no change would be made to this requirement, are hereby superseded by this Amendment to the extent of any inconsistency.

This Amendment shall form an integral part of the Bidding Documents and shall be considered by all bidders in the preparation of their bids.

Yours faithfully,

Project Coordination Unit
